Some of the information contained in this document contains "forward-looking statements". In many cases, you can identify forward-looking statements by terminology such as "may," "will," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential," or "continue," or the negative of such terms and other comparable terminology. These forward-looking statements are only predictions and as such inherently included risks and uncertainties. Actual events or results may differ materially as a result of risks facing Dresser-Rand Company (D-R) or actual results differing from the assumptions underlying such statements. These forward-looking statements are made only as of the date of this presentation, and D-R undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise. All forward-looking statements are expressly qualified in their entirety by the "Risk Factors" and other cautionary statements included in D-R’s annual, quarterly and special reports, proxy statements and other public filings with the Securities and Exchange Commission and other factors not known to D-R. Your decision to remain and receive the information about to be presented to you shall constitute your unconditional acceptance to the foregoing.
Any person allowing themselves to directly or indirectly receive the information contained in this presentation (the "Receiver") agrees that this presentation and all information contained herein and/or in any way distributed to the Receiver with respect to the same (verbal or otherwise) is the confidential and proprietary property of Dresser-Rand Company and is being provided to and received by the Receiver in confidence. Receiver agrees not to divulge the contents hereof to any third party without the prior written approval of Dresser-Rand’s duly authorized representative. Receiver shall advise any permitted recipient of the confidential information of the nature of the same and obtain their agreement to be bound to these terms before such confidential information is disclosed to them. Receiver on behalf of its principal, representatives, employees and themselves individually to hereby unconditionally agree to the terms hereof and agree to defend, indemnify, and hold Dresser-Rand harmless from and against any and all damages that result from Receiver’s failure to strictly comply with these terms. Receiver further agrees that failure to comply with these terms will cause Dresser-Rand to suffer irreparable harm. Your decision to remain and receive the information about to be presented to you shall constitute your unconditional acceptance to the foregoing.
Safety Moment

◆ A Dresser-Rand Safety Moment...

Safety - It's about people going home in good health to their families every night!
**Enginuity** applies the most effective technology for each application. This requires a combination of identification and evaluation of existing technology, qualification of technology partners for development, and in-house development efforts.

**NESHAP Compliance:**
Requires more than “Slap-On” equipment. It requires a strategic solution to meet compliance objectives.

</tbody>
</table>

- **SIP** - Screw-In Prechamber
- **HPFi** - High Pressure Fuel Injection
- **iBALANCE** - Power cylinder pressure monitoring. Can be tied to HPFi for automatic power cylinder pressure based balancing
- **iFLOW** - Compressor cylinder (head and crank end) pressure monitoring system
- **RELI** - Air/fuel ratio control system
- **Catalyst** - Can be applied to rich or lean burn based engines
- **GHG** - Greenhouse Gas
- **CMP** - Catalyst Management Program
- Slow Speed / Integral - Lean Burn (Operates at greater than 2% O2 in Exhaust)
- High Speed / Separable (Could be lean burn or rich burn engines)

Combustion Solutions

- Pure Turbocharger Conversion
  - GMW, KVG, GMWA, GMWC GMV,
- Enhanced Mixing
  - MPiV
  - HPFi
  - Single Point Injection
  - Multi Point Injection
- High Energy Ignition
  - SIP
  - Mini-SIP
Turnkey Emissions Solution

- Pipeline
- Gas Processing
- Gathering
- Refining
- Power
Solutions

Breadth:
With over 550 installations. Solutions range from our ground breaking HPFi, SIPS, MPiV, Catalytic Converters, Air/Fuel ratio controls, PLC Based Unit Controls.

D-R is the leading large-bore engine retrofitter today.
