

Ozone Standard Revision

- 2008.....75ppb
- December 17, 2014....65-70 ppb
 - Comments on 60 and 75 ppb
- Finalize October 2015
- State Monitoring – Up to 2-years
 - 2014-2016 monitoring data
- Designation of non-attainment areas – October 2017
- Infrastructure State Implementation Plans – Oct 2018
- Attainment Plans Due – October 2020-2021
- Attainment Schedule based on “Severity”

Current 75 ppb ozone standard

Counties With Monitors Violating the March 2008 Ground-Level Ozone Standards
0.075 parts per million
(Based on 2006 – 2008 Air Quality Data)

Notes:

1. Counties with at least one monitor with complete data for 2006 – 2008
2. To determine compliance with the March 2008 ozone standards, the 3-year average is truncated to three decimal places.

Unofficial Counties with 2006-2008 8-hour Design Value Above 0.070 ppm

Unofficial Counties with 2006-2008 8-hour Design Value Above 0.065 ppm

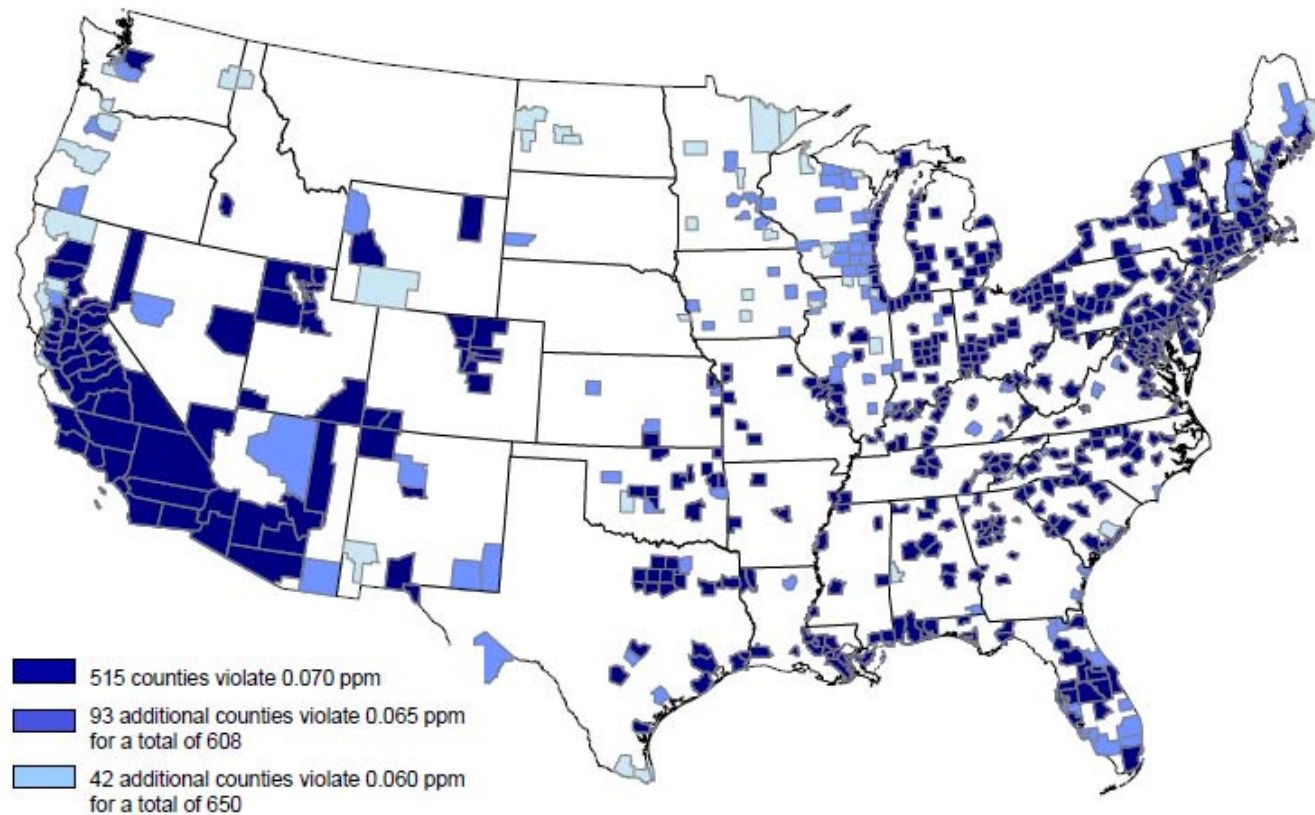

Unofficial Counties with 2006-2008 8-hour Design Value Above 0.060 ppm

Counties With Monitors Violating Primary 8-hour Ground-level Ozone Standards 0.060 - 0.070 parts per million

(Based on 2006 – 2008 Air Quality Data)

EPA will not designate areas as nonattainment on these data, but likely on 2008 – 2010 data which are expected to show improved air quality.

Notes:

1. No monitored counties outside the continental U.S. violate.
2. EPA is proposing to determine compliance with a revised primary ozone standard by rounding the 3-year average to three decimal places.
